In a match where a team is all out in less than the full quota of overs, the calculation of its average run rate and the average runs per over scored against the bowling team shall be based on the full quota of overs to which it would have been entitled and not on the number of overs in which it is dismissed. - 6.7 For each match teams may be composed of twelve players.
 - 6.7.1 Prior to the toss for each match, team captains must provide opposing captains and the umpires a list of their batting XI and their fielding XI. The player left out of the fielding XI will act as a 12th for the fielding portions of the match (i.e., the player may bat in the batting XI but may not bowl). Shirt numbers should be included on the team lists and a copy of the team lists provided for the scorers to aid with identification.
 - 6.7.2 The 12th may be rotated on and off the field acting as substitute fielder, bearing in mind the rules of cricket in terms of eligibility to bowl and bat in relationship to a player’s time off the field still apply. Players must inform the umpires of leaving / entering the field.

9. DELAYED START OVER CALCULATION

- 9.1 **Reduction of overs:** In the event of a late start for any reason, the number of overs to be bowled in respect of the match shall be calculated by reducing two overs for every 8 minutes of playing time remaining until the scheduled closing time for the game.
- 9.2 **Bowling restrictions:** In the event of a late start for any reason, the number of overs per bowler shall be reduced so that no bowler shall bowl more than one-fifth of the overs. For example, in a 30-over match, there shall be a maximum of six overs per bowler, in a 33-over match, three bowlers may bowl seven overs and two bowlers may bowl six overs.

10. THE RESULT & BONUS POINT

- 10.1 A result may only be achieved where both teams can bat for a minimum of 16 overs, or have been dismissed, or a result has been achieved earlier.
- 10.2 If due to suspension of play after the start of the match, the number of overs in the innings of either team has to be revised to a lesser number than originally allotted (minimum of 16 overs unless the team batting first was all out sooner), then a revised target score (to win) will be set for the number of overs which the team batting second will have the

opportunity of facing – this revised target being calculated by the Duckworth Lewis Stern Method which is inbuilt into the PlayHQ application.

- 10.3 The team that achieves a run rate of 1.25 times that of the opposition shall be awarded one bonus point. A team's run rate will be calculated by reference to the runs scored in an innings divided by the number of overs faced. Where a team is all out, the number of overs to be used is the maximum number of overs that team was otherwise eligible to face. Where matches are shortened and targets revised using the DLS system, bonus run rates and defensive targets are derived as a function of the revised target score and maximum overs.
